

Please calibrate the screen follow the bellow steps:

Run:

sudo nano /etc/X11/xorg.conf.d/99-calibration.conf

As the picture followed:

```
GNU nano 2.7.4 /etc/X11/xorg.conf.d/99-calibration.conf
--- added by elecrow-pitft-setup Fri 8 Jun 02:16:42 UTC 2018
Section "InputClass"
Identifier "calibration"
MatchProduct "eGalax Inc. USB TouchController"
Option "Calibration" "79 1985 152 1939"
option "SwapAxes" "1"
EndSection
--- end elecrow-pitft-setup Fri 8 Jun 02:16:42 UTC 2018
```

Modify:

option "Calibration" " xxx xxx xxx xxx" to option "Calibration" "79 1985 152 1939" or "4120 -49 4025 53", and need to add option "SwapAxes" "1" on the next line.

Then reboot the RPI.

You can also search "configure Utility" in the search bar, then open it and click "tool" ---"4-point calibration" to calibrate.
