About Elecrow

Electrow is a company specializing in the R&D, design (prototyping), and manufacturing of electronics. Founded in 2014, the company has grown to become a leading supplier of open–source hardware and electronic components, offering a wide range of products and services to customers around the world.

Where We Started

Arduino, Raspberry Pi and Micro:bit are the most popular open source hardware brands. We provide compatible products to help people learn and practice electronics. Most of the electronic modules selling on Elecrow website were designed and manufactured by ourselves.

Arduino Learning Kit Compatible

Raspberry Pi Learning Kit, Display, Enclosure and Other Related Items

Micro:bit Learning Kit and Related Modules

Elecrow Electronics Modules and Accessories

80 + color coded electronic modules for kids to create infinite possibilities

Comes with a programming software– Letscode, build projects by simple drag and drop

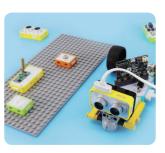

Plug and Play design for easy connection of modules

Compatible with common hardware platforms like Arduino, micro:bit, ESP32

Ample course materials for both learners and educators

Compatible with LEGO for an even more exciting educational fun

MODEL NO CRROOOHK

7 electronic modules and 5 cardboard projects to train kids' hands—on ability.

MODEL No. CRB0000LK

Explore Kit

13 electronic modules and 12 projects, which will help you lay a solid foundation for programming. No coding require.

MODEL No. CRB0000MK

Inventor Kit

Compatible with microbit V2 and LEGO block, make your own invention trip by Coding Instantly!

MODEL No CRROOMAK

Creator Kit

Code to build hardware and programming interactive projects with UNO.

You will enjoy different fun of programming

MODEL No. CRB0000PK

Master Kit

Creating Your Own Products! Compatible with ESP32, 6 modules, 16 projects, 3 fully functional products for you to explore.

MODEL No. CRK00066A

All in one pack Kit

You will get Hello Kit x 1, Explorer Kit x 1, Inventor Kit x 1, Creator Kit x 1, Master Kit x 1

Raspberry Pi All-in-One Kit

CrowPi Series All in One Raspberry Pi Laptop & STEM Learning Platform Convert between playing and learning in second Engineer your own electronics projects More than 80 programming courses Support multiple operating systems

CrowPi L

MODEL No. SER35001L Jun, 2022

CrowPi L is a lite version born out of CrowPi2, and "L" stands for Lite, Light, and Laptop. CrowPi L is a real Raspberry Pi computer designed for programming beginners.

CrowPi2

MODEL No. SER35002P Jun, 2020

CrowPi2 comes with a sensor development board featuring with 22 necessary sensors, such as buzzer, RGB LED, relay and so on, making it more convenient for students or makers to learn hardware electronics.

CrowPi

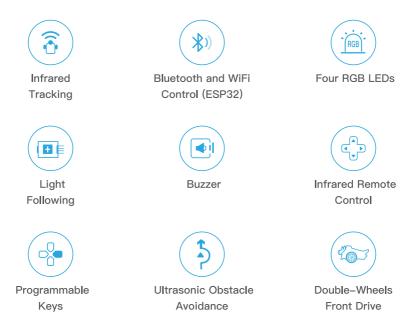

MODEL No. SES14002K May, 2018

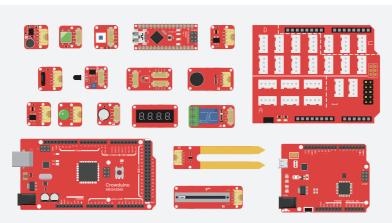

CrowPi is a development board equipped with 7 inch display that can help you learn Raspberry Pi in an easier way.

CrowBot-BOLT

CrowBot-BOLT is an open source smart programming car powered by an ESP32 chip. It has a wealth of sensors(such as a light sensor, ultrasonic sensor, and line Tracking Sensor), comes with Wifi and Bluetooth functions, and can meet a variety of programming environments like Letscode, Micropython, and Arduino. It can quickly realize functions such as light tracking, line tracking, obstacle avoidance, remote control, and light show.
